BRIEF  
2015/2016

- 1 ABOUT US
- 2 SECTORS
- 3 CAPABILITIES
- 4 PROJECTS
- 5 WORLDWIDE EXPERIENCE
- 6 CONTACT

A photograph of a person walking away from the camera on an airport tarmac. The person is wearing a dark jacket, olive green pants, and a backpack with an orange top section. They are carrying a large black suitcase in their right hand. In the background, a Chilean Airlines aircraft is visible, along with ground service equipment and other people. The sky is clear and blue.

**HUMAN CAPITAL IS  
OUR BEST VALUE**

# ABOUT US & TEAM

---

*“Human capital is our best value.”*

Quality geotechnical data is the key to design a reliable and cost-effective project...

---

GEOINTEC is specialized in the field of geotechnical, geophysical, hydrogeological and environmental services. Our dedication to engineering related to building, construction, civil engineering, renewable energy resources and mineral resources fields, is already long and based on the extensive experience of our technical team.

Human capital is our best value. GEOINTEC makes great efforts to maintain a motivated, trained and highly skilled technical team of Geotechnical Engineers, Renewable Project Experts and Senior Field Geologists.

---

Currently our company works on the following business lines:

- 1.- Geological and Geotechnical Consultancy and Engineering.
- 2.- Exploration in contaminated soils.

# SECTORS

Solar PV  
Thermosolar  
Wind Power  
EHV Substation &  
Transmission Lines  
Industrial  
Building & Civil Projects

Each industry and sector of activity has its own processes. We provide specific solutions and the full spectrum of geotechnical services.

We leverage our global footprint and leading expertise to provide geotechnical solutions in remote geographical areas and in extreme climates.

*"We provide specific solutions and the full spectrum of geotechnical services."*

**CAPABILITIES**

*"Focus in all project stages."*

# FROM GREENFIELD TO THE OPERATION STAGE

Quality geotechnical data is the key to design a reliable and cost-effective project...

The activity of GEOINTEC focuses in all project stages, from Greenfield stage to the Operation stage, providing the best geotechnical solution for all of them. GEOINTEC has a wealth of specialized resources to manage project risks, especially for those which are performed in difficult or challenging conditions, remote geographical areas and extreme climates where we frequently work.

A combination of professional capabilities, specialised equipment and a proper planning, a well-thought-out exploration programme for subsurface characterization, are the key to succeed and obtain a quality geotechnical data to design a reliable and cost-effective project.

# PRO- JECTS

*“Geotechnical Engineers, Renewable Projects Experts,  
Senior Field Geologist.”*

**+1.000**

**+1.000**

Load Test/Ramming Test

---

The vast experience gained in various areas and the work done in collaboration with engineers, architects, construction builders and promoters, allows us to cover projects of any size from direction and supervision until the close collaboration with the technical departments.

---

Soil and rock slope stability and foundation studies. Analysis U.L.S. for shallow and deep foundations, subsidence, global stability, uprooting and S.L.S. deformations and 3D settlements analysis.

---

Stability of excavations and open pits, supports elements for excavation stage, containment structures in operational stage.

Lowering of groundwater levels for excavation. Calculation of critical flows and gradients.

---

Supervision and control of ground investigation surveys. Technical assistance for construction stage.

Site selection, geological risks, interaction with the ground water table, Geological and geotechnical mapping.

# WORLD WIDE EXPE- RIENCE

*"We have experience for over five continents..."*

## Europe

Spain Portugal Andorra

## LatAm & Caribbean

Brazil Chile Jamaica

Mexico Panama

We have experience for over five continents, consolidated in LaTAM and Africa where we have conducted many projects, and emerging-growing in Asia and Middle East.

We have technical teams moving all over the world, provided with the most modern geotechnical equipments and samplers.

Our company is able to move teams in reduced time, performed the required geotechnical tests and send the samples to accredited laboratories in almost anywhere in the world.

## Middle East & Asia

Jordania Japan

## Africa

Angola Argelia Egypt  
Kenya Namibia Morocco
